### **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 3. Claims 1-11 recite the limitation "glass/glass ceramic panel". This limitation makes the claims indefinite because it is unclear if applicants are claiming a glass panel and a glass ceramic panel in the alternative or are claiming a combination of glass and glass ceramic.
- 4. Claim 5 recites the limitation "said metal foil or plate is profiled or structured". This limitation makes the claim indefinite because it unclear how the limitations "profiled" and "structured" further limit the claim. These terms are not defined by applicants' specification and are only mentioned once with out any definition (See page 6, lines 15-16).
- 5. Claim 11 recites the limitation "the glass/glass ceramic panel as defined in clam 1, wherein said cooking surface is...". The claim lacks antecedent basis for the limitation "cooking surface".

## Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 10/620,132

Art Unit: 1775

7. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by JP 02257545A (Natori et al.).

Natori teaches glass plate embedded with a metal plate lattice (force locking manner without an adhesive) (See abstract).

- 8. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by US 5,820,991 (Cabo).

  Cabo teaches two glass sheets with a metal foil layer fused between the glass sheets

  wherein the metal plate and glass sheets are fused together (col. 7, lines 10-26).
- 9. Claims 1, 2, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4,124,020 (Noble).

Noble teaches a solar energy collector comprising a protective glass sheet (19), and metal plate or sheet (17) attached to each other by clamping bolts (col. 2, lines 45-68 and col. col. 3, lines 3, lines 16-29). Noble further teaches that there is a gap between the sealed metal plate and glass plate and which is filled with a heat absorbing liquid (Figure 1 and claim 1).

#### Conclusion

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Stein whose telephone number is 572-272-1544. The examiner can normally be reached on Monday through Friday from 8:30 a.m. to 5:00 p.m. If the attempts to reach the examiner are unsuccessful, the examiner's supervisor, Deborah Jones can be reached by dialing 571-272-1535. The official fax number is 703-872-9306.
